AMENDMENT

ASSISTANT COMMISSIONER FOR PATENTS
WASHINGTON, D.C. 20231

SIR:

Responsive to the Office Action dated August 27, 2002, Applicants respectfully request reconsideration of the above-identified application in view of the following amendment and remarks.

IN THE SPECIFICATION

Please amend the specification in the paragraph beginning at page 2, line 12, as follows:

(B)

In the context of the use of a glass-adhesive-glass laminate as a side automobile glazing cited previously, patent application EP 0 418 123 A1 describes the improvement of the acoustical abatement properties, obtained through use of an appropriate intercalation of 0.8 to 2.0 mm in thickness. This intercalation is a vinyl chloride-glycidyl methacrylate copolymer; certain thermoplastic PU also may be suitable, PVB, on the contrary, being avoided.
